

# CONVEYOR HIGH RISK ZONE CHECKLIST

Use this checklist to assess your conveyor hazards and to prioritize your action plans. For each zone listed, assess your risk rating using the following guidelines:

**A** = Area is unguarded, hazardous conditions exist and guarding is required for compliance

**B** = Area that requires frequent maintenance or clean out and guarding needs upgrading

**C** = Guarding exists but should be improved for compliance

**D** = Not applicable or no hazards exist

RISK RATING	ZONE	HAZARD POINT
<input type="checkbox"/>	1	Tail pulley
<input type="checkbox"/>	2	Head pulley
<input type="checkbox"/>	3	Gravity take ups and counterweights
<input type="checkbox"/>	4	Snubber pulleys
<input type="checkbox"/>	5	Additional drive pulleys (other than head section)
<input type="checkbox"/>	6	V-belt or chain drives
<input type="checkbox"/>	7	Transfer or load out points
<input type="checkbox"/>	8	Skirt boards
<input type="checkbox"/>	9	Return Idlers
<input type="checkbox"/>	10	Troughing Idlers that have obstructions (i.e. - ladders)
<input type="checkbox"/>	11	Conveyor bends
<input type="checkbox"/>	12	Tripper conveyor
<input type="checkbox"/>	13	Bearings/Rotating Shafts
<input type="checkbox"/>	14	Couplings
<input type="checkbox"/>	15	Other _____

**Zones that were identified with an “A or B” risk rating, present immediate danger to workers in the area and need to be addressed immediately.**

Zones that have a “C” risk rating should be reviewed with your Supervisors, Workers and your Joint Health & Safety Committee to determine what improvements are required and establish a reasonable time frame for completion.
